Project Portfolio: <https://github.com/DelaneyRyley>

I am a final-year Environmental Science Student at the University of the Sunshine Coast with a passion for data analysis and GIS. I am currently completing my minor in Geospatial Analysis and have extensive extra-curricular experience with R-based programming, data analysis, and technical writing. My strengths lie in project and time management, workflow optimisation, and effective communication, while bringing a strong attention to detail to my work. I am now eager to apply these skills to industry to further develop my skill and create a positive impact.

Education

Bachelor of Environmental Science, Minor in Geospatial Analysis.	2024 – 2026	<u>University of the Sunshine Coast</u>
Cert III in Information Technology Systems	2023	<u>Tafe Queensland</u>
Bachelor of Design	2019	<u>University of the Sunshine Coast</u>

Experience

Coles Supermarkets (Occupation)	Nov 2020 - Current	• Floor management • Team leadership • Workplace health and safety auditing • Strong customer service skills • Electric pallet jack trained • Stock management
Enactus President	June 2026 – Current	• Entrepreneurial project management with sustainable goals. • Founded and managed sustainability focused 'clothing library' • Liaison with community members • Provide administrative support for internal and external stakeholders

Modelling tool suitability assessment	Nov 2025 - January 2026	• Literature review on marine ecosystem modelling • Evaluating R-package suitability to supervisor needs • Research data availability for marine modelling • Synthesise and present findings in a report and presentation.
Behaviour Data Analysis (Volunteering)	Nov 2024 - January 2025	• End-to-end data analysis in R • Developed a reproducible report generator for environmental consultants (GitHub) • Independently manage project timeline to meet milestones
Bat Data Analysis (Volunteering)	Nov 2024 - January 2025	• Literature review on scientific methods • Synthesise and present results. • Data clean-up and handling • Developed a program for automating data handling (GitHub)
Noosa River Environmental Data Collection (Volunteering)	June 2024	• Soil and water sampling of the Noosa River • Abiding by local QWPS guidelines while on site. • Adhere to safety procedures and equipment use.
SES Kawana (Volunteering)	January 2020 - January 2021	• Environmental and flood safety • Safety and hazard training • Routine fieldwork practice and exercises • Teamwork and communication to maintain the safety of the public and field members.
